Lot 122

Wednesday, February 13, 2013
1:00 pm CST
Napoleon Livestock, Napoleon, ND

**Selling 73 Red Bulls, 53 Black Bulls
35 Bred Heifers and 25 Commercial Heifers**

Welcome to Breeding for the Future's 15th Annual Production Sale! Our families look forward to visiting with you at the ranch and on sale day.

We are excited to offer our most "complete" bull lineup ever! Our red and black polled Simmentals are bred to excel in carcass traits, performance, maternal characteristics and soundness for longevity. Many bulls have been tested and display 50K enhanced EPD's, giving them the highest accuracy EPD's available today.

Included in this year's offering are 35 purebred Simmental (WS & CDI) bred heifers, sired by WS Beef King, HSF High Roller, CDI Ridgeline and 25 Simmental sired yearling heifers from C Diamond's commercial herd.

Due to the greater number of lots in this year's sale, **we have decided to use bidder numbers in an effort to streamline the bookkeeping for the clerk.** We appreciate all who bid and buy and have enjoyed being able to recognize each personally. We hope this change will not be an inconvenience to our customers. **Please stop and register for a bidder number at the office on sale day!**

Also new this year, the entire sale offering will be videoed and available to view online prior to sale day at www.DVAuction.com. DVAuction will also be broadcasting the sale on Feb 13th. Be sure to set up an account with DV if you plan to view/bid on sale day!

We encourage you to stop at either or both ranches at your convenience. We enjoy being able to visit with each of you personally and appreciate having the opportunity to show the dams and sires of the sale offering. To anyone stopping at either ranch, your name will be added to a list of those receiving \$50 off a bull purchase on sale day. Bulls and heifers will be on display at Napoleon Livestock on February 11 and 12.

We thank you for your past support and welcome any questions regarding our Simmental programs!

Blessings,

Terry Schlenker & Neil Nicholson & families

Announcements

Announcements made sale day and from the auction block during the sale, take precedence over printed material associated with this sale.

Wilkinson Farms Simmentals and C Diamond Inc. will reserve 1/3 semen interest and the right to collect semen on any bull sold in this sale (for in-herd use only). This would be done at seller's expense and buyer's convenience.

All cattle sell under the terms and conditions of the American Simmental Association.

Any cattle going to CANADA will be delivered to the nearest ND/CAN border crossing facility. These cattle will be tested and cleared for export for a \$100/head fee.

We will not be responsible for death or injury. We **highly recommend** that you insure your bulls on sale day, if they are to go back to our ranches.

Heifers: All buyers of females will be responsible for the heifers after the sale. We will help to coordinate hauling arrangements, if needed.

IN CASE OF STORMY WEATHER, listen to Napoleon Livestock's weather-related announcements on: KBMR 1130 am, KSJB 600 am, KHND 1470 am, KZZY 103.5 fm & KNDR 104.7 fm radio stations.

Breeding for the Future Advantage

- Feed bulls until April 1st. After April 1st, we will charge \$2/day for each animal.
***Note for feeding bulls.** CDI is in the heart of their calving on April 1 and probably will not get deliveries made until later. You will NOT be charged feed costs without prior notice.
- Test all bulls and guarantee their soundness at delivery.
- Free bull delivery up to 200 miles.
- We ultrasound all bulls and all replacement females.
- Wilkinson Farms now has data for their entire herd with 14 years of ultrasound history. C Diamond has 10 years of ultrasound data on their herd.

Become friends with Wilkinson Farms Simmentals & C Diamond Simmentals to view more pictures, herd sires, videos, etc...

We encourage farm visits, at your convenience. Visitors to either Ranch to view the sale offering will get a \$50 discount off of a Sale Day Purchase [BULLS ONLY]. We hope to see many of you!

Directions to Wilkinson Farms Simmental

From I-94 – Exit 248 (Oil tanks), follow paved frontage road west 1 mile. Turn left (south) 13 miles (last 2 miles gravel). Take a left (east) 3-1/2 miles.

Hwy. 281 – Turn west at Montpelier sign. 6-1/2 miles west on gravel.

From Gackle – East to 76 Ave. SE. Turn north, go 5 miles and 1/2 mile east.

Directions to C Diamond Simmentals

From I-94—Exit 208 (Dawson). South on Hwy. 3 (approx. 10 miles) to mile marker 75, 1 mile east.

From Napoleon—North on Hwy. 3 (approx. 15 miles) to mile marker 74, 1 mile east.

Watch & bid online for FREE at

DVAuction
Broadcasting Real-Time Auctions

**View the Auction Live!
Bid Online... you're ringside
right at your desk!**

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

DVA Rep. Justin Dikoff (605) 290-0635 - email: jdikoff@dvauction.com
Please feel free to contact me with questions about the sale or to view the cattle for you.

Allied Genetic Resources is a business owned and supported by a group of committed cattle seedstock producers, but designed to promote the profitability of their customers. The future of genetic production and marketing will become more focused on customer service and increased profitability and less about the tradition of just selling bulls. Superior genetics must not only function to increase efficiencies at the ranch, they will need to be desired and differentiated in value by the beef industry. Allied is positioned to provide those types of services. Whether you are looking for genetics tailored to your commercial production environment and resources, or you are searching for profitable marketing options, we can help.

ALLIED
GENETIC RESOURCES

The owners of Allied Genetic Resources are located in 16 states from California to Alabama and Montana to Texas and currently market more than 4500 bulls each year. This scope and selection helps to insure great selection and quality whether you need 1 or 100 bulls or any size group of replacement females. With nearly 2300 SimAngus bulls, 1100 Simmental, 800 Angus and Red Angus and 250 Balancer bulls marketed annually, Allied owners offer tremendous selection regardless of your genetic needs.

Ultimately, the value of the allied group of producers is in their character and commitment to customers. This business rests firmly on the combined reputations of some of the highest quality people in the beef business. Independent farm and ranch families all with a proud tradition of standing behind the bulls and females they sell and working with the goal of commercial customer profitability.

I'm just buying a bull....right?

Most of us don't really believe that, yet the gravity of the decisions associated with selecting the next generation of seed stock may be greater than you first think. All of us consider the calves these bulls might sire and the value they should return to the ranch. Most consider pricing bulls based on a projection of years of service hopefully 4-8 years barring injury and the calf performance we might expect them to sire. If you don't keep your own replacement heifers, this makes some sense. If like most you keep females, the long term effects of this year's buying decisions on ranch profitability may not be quite as obvious until we break it down based on the long term maternal value traits we are purchasing.

Let's assume your operation purchases 4 bulls this coming spring of 2013.

- First calves born in spring of 2014
- First daughters calving in spring of 2016 (First granddaughters calve in 2018)
- With any luck at 2 or more of these bulls are still breeding at age 7 (2019)
- Last calves born sired by these bulls in 2020
- Last calf crop females have their first calves in 2022 (Their first daughters calve in 2024)
- In 2023 a substantial share of the 2-7 year old cows are daughters of the bulls purchased 10 years before.
- In the year 2031 there are still a few 11 and 12 year old daughters in your herd sired by the 2013 purchased bulls.
- In the year 2031 the granddaughters and great granddaughters of the bulls purchased 18 years ago still make up a substantial portion of the genetics of your herd.

I know, most of us don't like to think about the year 2031. Seems like the Bi-Centennial was just a few years ago (actually 37 years!). If however your plans are to keep or make the beef business an important part of your families livelihood as far out as 2031, which most of us do, the bulls you purchase this year will still be an important piece of the profits you enjoy or the challenges you are still working through nearly 20 years from now. Sire selection is that important, so use all the tools available to make the best decisions you can every time!

So, if you would like to see a snap-shot of your cow herd 10-20 years from now in 2031, you need only spend some time with the seedstock herd you purchase bulls from. With the exception of a few differences created by environment, what you see is where you are headed! The size, disposition, body condition, udders, feet, calving ease, fertility, longevity, etc of your future cow herd is right there to see. Not just the mature cows either, make sure you look at the 2 and 3 year olds too and consider the direction your source is moving. That is why it is so crucial to choose a seedstock source that is headed where you want and need to be.

SUGGESTED GUIDELINES FOR USING YEARLING BULLS:

We are firm believers in the use of yearling bulls and feel it is one of the best years of their lives. It is a time when they are easy to manage and their only concern is breeding cows. We have found that yearling bulls that are managed carefully during the second year of their lives, not only do well, but they will perform better, over time. Below are some suggested guidelines for the care of yearling bulls.

- Upon delivery to your ranch, keep yearling bulls separate from older bulls and feed them a maintenance ratio of 5-8 lbs per head of grain and free choice hay. Reduce the amount of grain fed gradually, so that bulls are on straight hay or grass 2-4 weeks prior to the breeding season.
- Where possible, try to limit the bulls to 45-60 days of pasture service the first year. At this time or as soon as possible remove the bulls and put them in separate pastures with plenty of good quality grass. It is best to achieve the growth and strength to compete with older bulls for feed and space.
- You will see the benefit of a little added cost and care of feeding a yearling bull by probably two or three more years of service from a well-managed and healthy bulls.

EXPLANATION OF ASA'S NEW EPD EVALUATIONS

Presenting Fall 2012 EPDs on a NEW BASE:

The Fall 2012 ASA Genetic Evaluation marks the first time major breeds have expressed their EPDs on a common base (i.e., the same scale). The common base was a natural evaluation of the RAAA/ASA (Red Angus Association of America / American Simmental Association) genetic evaluation partnership. Though forming a common base will initially lead to some confusion, the boards of both organizations unanimously agreed that it was a positive step for the beef industry – a step that allows producers to directly compare genetic predictions from the largest multi-breed database in the world.

As with any progress, there is change. Breeders and commercial producers will need to adjust to the new base. Much like converting from Fahrenheit to Celsius, it may be a struggle at first, however, over time we will all grow accustomed to the new scale. For example, look at the average EPDs of purebreds shown in this table to the right.

The Changes to the base does not change the evaluation of animals; it just changes the magnitude of the EPD. IT has the same impact on all animals. Be sure to use the new percentile tables to develop a “feel” for the new EPD base.

*Percentages listed below EPD's indicate rank of that EPD in the Breed average.

WS Beef King W107 has quickly proven his ability to sire extremely high performance progeny that possess sound feet and legs, thick tops and muscle in attractive packages. Scrotal circumference in his sons are also very large. Progeny have been very well received. Daughters look great! Semen available through Genex CRI

HSF High Roller continues to amaze us with the birth to weaning spread on his progeny. He's an outcross to many of the popular sires in use today. High Roller daughters are top-producing females with sound udders and quality milk production. Semen available through Genex CRI.

WS Beef Maker is a 6 way trait leader and continues to prove himself as a sire of cattle that do well from birth to rail. For the fourth year in a row he is the most used red Simmental bull in the breed. His daughters are just icing on the genetic cake. Semen available through ABS.

CDI Endeavor has quickly established his ability to transmit his extreme length of body with attractive style and presence. The performance he adds will make his sons a sale day feature.

WS High Stakes is a red calving-ease genius. He has surpassed our dream of a red calving-ease sire. His calves' growth is very good. His first daughters are starting to calve and look to have plenty of milk. Semen available through Wilkinson Farms.

Hook's Xpectation has proven to be the ultimate calving ease bull. His progeny are perfect structured and have a stylish look to them. We expect the females to be outstanding.

Sire: GW Red Coat 099TS

API - 127 TI - 77

Dam: HSF Miss Sky 87U

Dam's Sire: ER Big Sky

Granddam's Sire: SRS Fortune 500

Comments: Homo Polled non-diluter. This dark cherry red bull is one of our best ever! Plenty of depth of rib and a deep-quartered bull with loads of performance. These bulls outcross red pedigree just adds to their genetic value. This bull was #4 for YW, & #3 for ADG.

Lot 2 WS Zenith Z55

Color: Solid Red

Tag: Z55

HPS: P

Sire: GW Red Coat 099TS

API - 132 TI - 78

Dam: HSF Miss Sky 87U

Dam's Sire: ER Big Sky

Granddam's Sire: SRS Fortune 500

Comments: Homo Polled non-diluter. This dark red bull is as good as his brother. He is built a little differently, but is long, deep-chested & wide-butted. He was #2 in YW & #1 for ADG. You will also notice the impressive scrotal sizes on these two bulls.

Lot 3 Embryos

HSF MISS SKY 87U x GW RED COAT 099T

MATING EPD'S											
CE	BW	WW	YW	MCE	MM	MWW	CW	YG	MB	BF	REA
13	0.5	69	109	12	16	50	34.4	-.20	.23	-.05	.67

API - 131 TI - 75

Comments: We've decided to part with four (4) of the embryos out of our remaining inventory of this mating. The Dam, HSF Miss Sky is the Dam of Lots 1, 2, 4 & 5. We will guarantee two pregnancies if work is done by a certified embryologist. We feel the full brothers speak for themselves and their genetic quality. Performance, ADG, scrotal, muscle and style plus an outcross red pedigree make this a very valuable package.

Sire: WS Beef King W107

API - 146 TI - 84

Dam: HSF Miss Sky 87U

Dam's Sire: ER Big Sky

Granddam's Sire: SRS Fortune 500

Comments: Homozygous Polled non-diluter. A Herd Sire prospect for sure. As heavy-muscled as you'll find. He was raised by a first calf heifer so WW isn't big, but look at his after weaning gain! He was #4 for ADG. He is probably our deepest-quartered bull in the sale.

HSF Miss Sky 87U

ASA #: 2532390

Comments: What a treasure this cow has been! A hard-to-find homo polled ER Big Sky daughter with a great set of EPDs, who flushes very well and has a Dam with an outstanding production record. She ranks in the top 10% of the breed for CE, MCE, MM, MB & API. She also ranks in the top 15% for BW & TI. The matings with Beef King & GW Red Coat have produced some very impressive offspring. We think this is just the beginning of a much greater future for this young cow.

Sire: WS Beef Maker R13 API - 127 TI - 75

Dam: WS Miss Real Deal 88

Dam's Sire: LRS Red Reality

Granddam's Sire: EC45 X's Red -G23

Comments: Homo Polled non-diluter. A very nice son of Beef Maker. His Dam is also the Dam of twin sisters, T11, (our Donor cow) and T10, (Dam of High Stakes). The disposition on this calf and his Dam is outstanding! Beef Makers are always in demand.

API - 135 TI - 81

Dam: CDI Ms Gunner 2S

Dam's Sire: TNT Gunner N208

Granddam's Sire: Hook's Shear Force 38K - 8N

Comments: Homo Polled. The only blaze faced bull from the CDI offering. Typical powerful son of Beef King out of a picture perfect Gunner daughter. He does have two small white socks on his rear ankles, but should have many friends sale day if looking for a blaze faced bull.

Lot 53 CDI 211Z

Sire: Traxs Rushmore X103 API - 137 TI - 74

Dam: CDI Ms Gambler 9U

Dam's Sire: TJ The Gambler

Granddam's Sire: Hook's Shear Force 38K - 9R

Comments: Homo Polled. Extremely soggy, deep bull that will probably be one of the top Rushmore sons to sell this year. He ranked #7 for WW. His dam is an excellent young Gambler daughter that puts an interesting outcross twist on this bull's pedigree.

Lot 55 CDI 212Z

Sire: GWS Ebony's Trademark **API** - 118 **TI** - 70

Dam: WS CR Cinnamon X114

Dam's Sire: HSF High Roller 12T

Granddam's Sire: Hooks Shear Force - U107

Comments: Homozygous Polled, Hetero Black. An impressive Trademark son who started small, but has performed well. He's got more frame than most calving ease bulls, but so has High Roller. He and his Dam's disposition are unmatched.

Lot 78 WS Sure Thing Z15

Sire: WS Beef King W107 API - 158 TI - 88

Dam: CDI Miss High Roller 39W

Dam's Sire: HSF High Roller 12T

Granddam's Sire: LBR Crockett - 88T

Comments: Homo Polled & Hetero Black. You would have to drive the wheels off to find them much better. It is hard to fault him in his physical make up and his muscle expression is impressive. His disposition and an outcross black pedigree just increases his value. Not to mention, there are no holes in his performance, scrotal & EPDs. We would like to sample him on some heifers and know he will work great on cows.

Lot 84 WS Black Coat Z42

Comments: This female is a twin and also quite young, she should mature into a very nice female though. Her grandam, P410, is quite the cow, phenotypically.

BELOW IS A QUICK REFERENCE TO AN EXPLANATION OF EPD'S:

Expected Progeny Differences "EPD's" are the most accurate and effective tool available for comparing genetic levels. In using the EPD differences between two sires EPD's represents the unit difference expected in the performance of their progeny. (Listed below are the units ASA EPD's are expressed in).

(Average EPD's are on the bottom of the percentile table above)

Calving Ease (CE) percentage of unassisted births when used on heifers.

Birth Weight (BW) pounds of birth weight.

Weaning Weight (WW) pounds of weaning weight.

Yearling Weight (YW) pounds of yearling weight.

Maternal Calving Ease (MCE) percentage of unassisted births in first-calving daughters.

Maternal Milk (MM) pounds of weaning weight due to milk.

Maternal Weaning Weight (MWW) pounds of weaning weight due to milk and growth.

Stayability (Stay) percent of daughters remaining in the cowherd at 6 years of age.

Carcass Weight (CW) pounds of carcass weight.

Yield Grade (YG) yield grade score.

Yield grade is an indication of the yield of red meat within a carcass. It is calculated by using several factors including 1) fat thick-

ness, 2) kidney, pelvic and heart fat. 3) hot carcass weight 4) rib eye area. A (-) EPD is better.

Marbling (MRB) marbling score.

Indexes: The last two columns in the EPD section are fairly new to the Simmental breed, but interesting, they are \$ indexes. Though EPD's allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes blend EPD's & economics to estimate an animal's overall impact on your bottom line.

All Purpose Index: (API) It is exactly what it says, all purpose. This index includes every trait that can be calculated: calving ease, pounds at weaning and yearling, keeping replacements back, milking ability and stayability, then the calf crop. It took into consideration, some being retained as replacements, then the rest being fed out and sold grade and yield.

Terminal Index (TI): This index is to be used if all calves are going to a feedlot. It evaluates a sire only for use on mature cows with all calves put on feed and sold grade and yield. No other factors were figured in.

Using API and TI: First determine which index to use. If you're breeding heifers and keeping replacements, use API. If all calves are going to the feedlot and finished, use TI.

Commercial Heifers

C Diamond Simmentals will be offering 5 groups (5 heifers/group) from our commercial replacement heifers. The heifers are 3/4 to PB simmental heifers. The heifers will be PG'd open and bangs vaccinated.

Allied Genetic Resources

Investing in your Success

Our philosophy has always been to produce the most profitable cattle we can for you our customer. We also understand that capturing the value of the genetics you are using is not always an easy task. That is why we are excited to announce that **Wilkinson Farms and C Diamond Simmentals** have invested in Allied Genetic Resources.

Allied Genetic Resources is owned by nearly 50 of the most progressive seedstock operations in the US. Together we are the largest seedstock supplier in the country which enables us to offer the critical mass necessary to help create added value for your calves. What makes this company unique is that it was designed solely to help you be more profitable and to help us provide you with better customer service.

Allied Genetic Resources (Allied) was created to help you market your cattle more effectively, and to help you reach your own individual goals for your operation. We are excited about the opportunity to leverage the strength, size and scope of this group to provide improved outlets for your cattle.

You will be hearing much more about Allied moving forward as they will be an integral part of our customer service and marketing assistance program. We are committed to your success and believe that Allied will help us in that regard. We are excited about the future of this industry and that our investment in this company will enable us to help you increase your profitability and enjoyment.

For more information contact them directly, **Marty Ropp 406-581-7835**. More information can also be found on their **website at alliedgeneticresources.com**. Their mission is simple help you capture and leverage the value of our genetics.
